

# Metafor Study, Hyderguda

## Study Highlights

- This was a retrospective, non-randomized, single-center study of Metafor sirolimus-eluting coronary stent (SES)
- The study showed the prolonged safety and performance of the Metafor SES who underwent percutaneous coronary intervention.

### ❖ Study Design

A retrospective, non-randomized, real world study

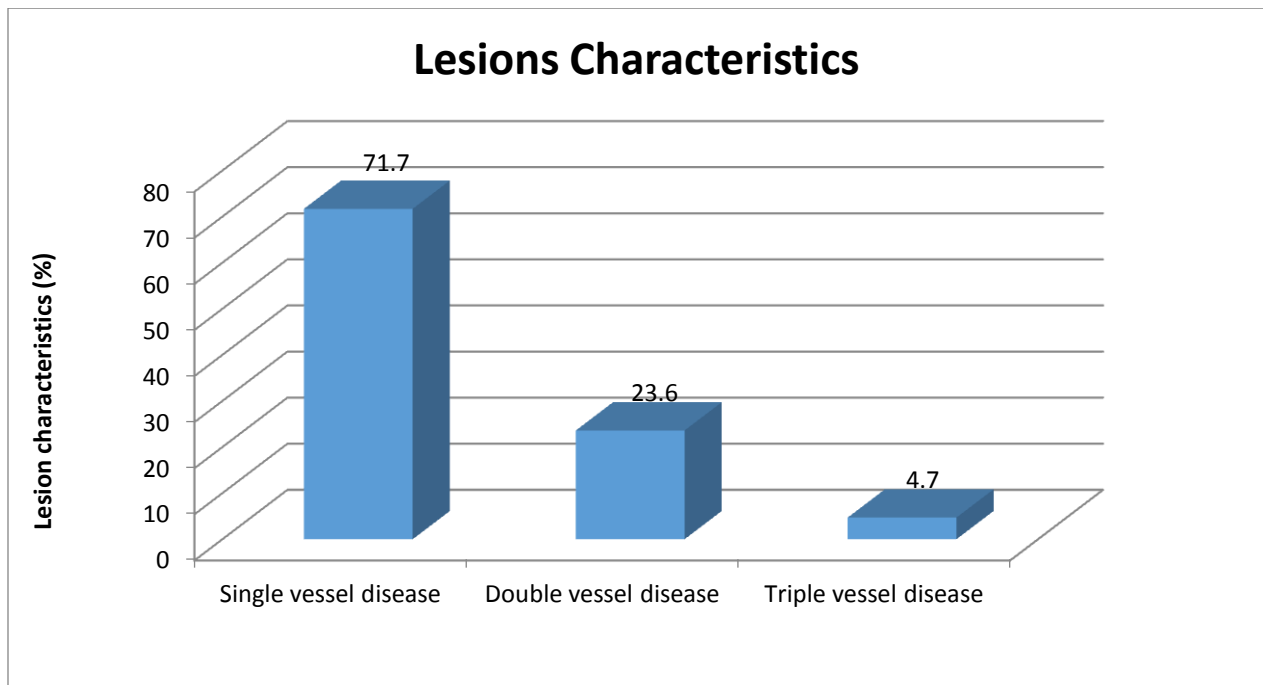

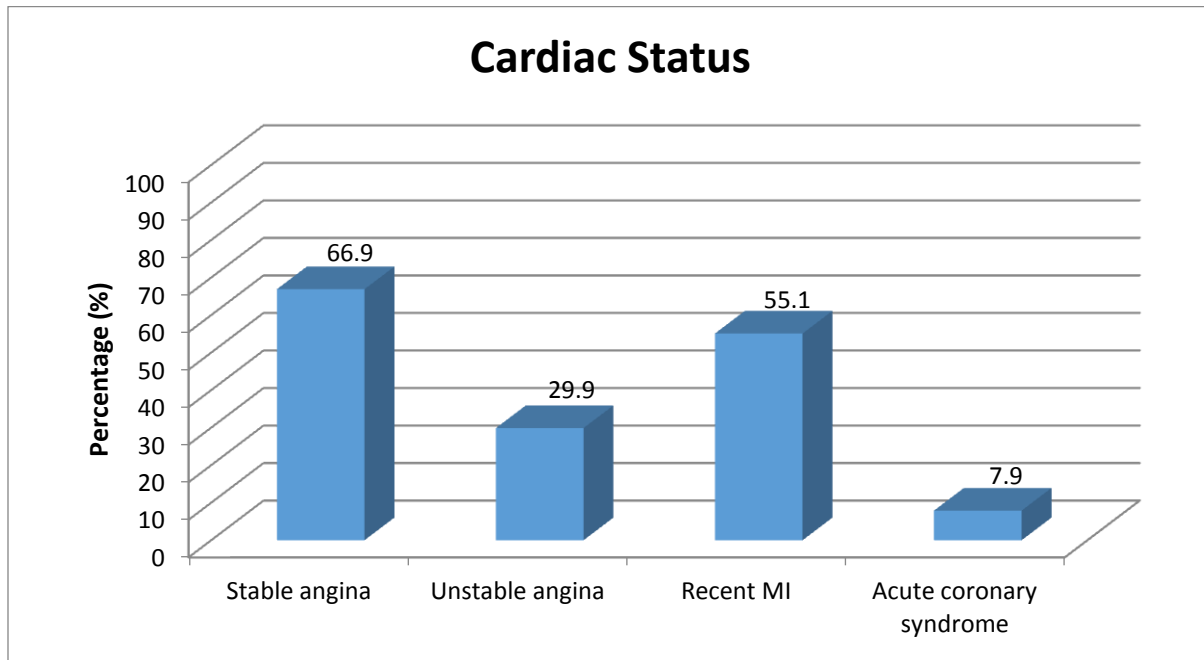

127 patients were enrolled

Clinical follow-up at 3.6 ± 0.6 years

## ❖ Clinical Presentation
